Respondents had clear preferences for which areas of the District should provide more affordable housing.
Respondents want...
A fairer distribution of affordable housing across the city
“Affordable housing needs to be evenly distributed with each area of the city bearing their "fair share" of the housing stock.”

To prioritize development in areas that will generate opportunity
“Easy accessibility to employment centers across the District is crucial to healthy economies. If low income households are closer to work, better schools, more affluent, and safer neighborhoods it means a stronger economic future.”

Access to transit, schools, jobs and grocery stores
“Distribution is very important...particularly around transit options and other amenities.”
